Institutional stainless AISI 304 handle

Handles specially designed for offices and institutional buildings with standard applications.

Stainless steel AISI 304 finish
It is an austenitic steel (18% chromium, 8% nickel). Although austenitic steel is not magnetic, once it's been mechanized it can modify its structure and be attracted by a magnet. It offers excellent corrosion resistance, even in outdoors installations.

Features
Recoil spring protected by a Delrin cartridge for the rose. Spiral spring system in institutional plate and long plate. Fixing with a through bolts/screw, except in the institutional plate, which is fixed with through bolts.

Regulations
It meets the requisites of the UNE-EN 1906 standard for building fittings.

It is also above the maximum grade of the corrosion resistance standard UNE-EN 1670.
Ultraviolet resistance: unaffected.
Excellent resistance to chemical attacks.

Fixing system
Depending on each model, fixing is carried out with fixed through bolts, floating through bolts or coach screws straight onto the door's leaf.

Institutional stainless AISI 304 handle

Sena AISI 304
